COAL TECHNOLOGY INFORMATION CENTRE

KEYWORD INDEX

COAL TECHNOLOGY INFORMATION CENTRE

COAL-ABSTRACTS INDEX

1980

VOLUME TWO

INTRODUCTION

The Coal Technology Information Centre was established in April 1978, as part of the Alberta Research Council. The Centre, which is funded by the Alberta Department of Energy and Natural Resources, acts as an agency through which information can be furnished to Government Departments, Industry and

As well as maintaining and updating a computerized searchable databank, the Centre provides a published The objective of the Coal Technology Information Centre is to identify, collect, index, store, retrieve and disseminate information related to the winning and subsequent processing of coal. cummulative edition and a semi-annual update.

The published Index consists of three volumes.

VOLUME ONE: List of Holdings - consists of identifier, title, author, source and other relevant information related to each document in the databank.

Article, Gasification

Proceedings of the 13th Intersociety Energy Conversion Engineering Conference, Volume 1, San-Diego, By Strickland, L.D. / Martin, J.W. / Liberatore, A.J. Morgantown Energy Research Center, Design considerations for an in-situ gasification test of Eastern bituminous coals Morgantown, West Virginia California, p. 355 - 365

Aug. 1978

(*) means a table of contents for this document is available on-line.

(a) Identifier:

Volume One of the Index is arranged in separate subject categories. The first two numbers of the identifier are a number code indicating one of the eleven different subject classifications.

- GASIFICATION
- **IQUEFACTION**
- BENEFICIATION 002 003 005 005 005 005 005
 - MINING
- **ENVIRONMENT**
- COMBUSTION
- RANSPORTATION **GEOLOGY**
 - EXPLORATION
 - PROPERTIES
- ENERGY POLICY

The second set of two numbers indicate the year the document was published. Citations are listing under each subject category in descending chronological order.

(b) Abstracts:

Abstracts of all documents in the Index are available in a printed or on-line format, at the Coal Technology Information Centre.

(c) Keywords:

Specific keywords have been assigned to some of the documents in the databank and they are also available on-line. VOLUME TWO: Keyword Index - consists of an alphabetical listing of keywords followed by the identifier, title and report number of the document in which they appear. These citations are also listed in descending chronological order.

VOLUME THREE: Author/Corporate Author Index -

Part One: an alphabetical listing by author surname.

Part Two: an alphabetical listing by corporate author phrase. Citations are listed in descending order in both parts of this index. The Centre maintains a full copy of the original article for reference purposes. All material in the databank can be photocopied for a small service charge. Any on-line search requests can be conducted through the Coal Technology Information Centre or through the Alberta Retrieval Association (AIRA) in Edmonton.
